Propane fueled **HONDA EU3200i**

Modified and warranted by Genconnex®

**HOSE
INCLUDED**

Stunningly quiet.

Typical Generator = 72dba @ 21ft. which is roughly equivalent to a Diesel Freight Train running at approx 25mph.

54dBa @ 1/4 load

Propane Inverter Generator

No more storing gasoline!

Propane & natural gas last essentially forever & run days not hours!

Keep it simple

- ✓ Heat
- ✓ Well pump
- ✓ Fridge & Freezer
- ✓ Microwave
- ✓ Hall lights
- ✓ TV & Internet

Problem Solved.

Our Propane modified Honda EU3200i Inverter generators come with your *choice of a propane hose.

Approximate 1-2 days run time for typical home load on a 40lb tank.

*Hose Selection includes options for connect to BBQ tanks or large above or below ground tanks, NOTE all gas work/connections other than connecting to a BBQ tank requires a licensed plumber.

Propane tank not included

VERSIONS AVAILABLE

Base Model

2-20Amp, 1-L5-30 (30Amp 120Vac) outlets
GXG LP-EU3200i-EC1

Please see website for more details & current pricing

Propane Modified Honda EU3200i Inverter Generator by Genconnex[®]

Propane Ready

Connect it up to your barbecue tank and run (high altitude orifice kits available up to 10,000ft)

Propane	Load
2.28 lbs/hr	at 2,600 Watts
1.57 lbs/hr	at 1,400 Watts
1.17 lbs/hr	at 700 Watts

3200 Watts Peak (propane)

2600 Watts continuous rated > 30 minutes

Inverter Output 120Vac

Extremely efficient & electronics safe
Parallelable with second EU3200i

Ultra Sound-Absorbing Enclosure

At 54dBa @1/4 load, sleeping won't be a problem

Approx. 60 pounds

Optional Genconnex Wheelie-cart™ available soon
22.5"l x 12"w x 17.8"h

Blue-tooth built in

Pair it with Honda's app to turn off and check status

EPA certified with new 3y Warranty

HOW QUIET? 54 dBa (Honda EU3200i) is equivalent to a quiet conversation
72 dBa (Most other brands) is equivalent to a freight train passing by you at 35mph

What sets us apart? All Genconnex[®] products are made exclusively with custom stainless steel and aluminum structural components, use all stainless steel locking fasteners for vibration resistance, and all gas line components are brass to resist corrosion and fatigue (as seen often with plastic fittings). In addition, and all units are 3rd party tested for emissions compliance and EPA certified for use in all 50 states.

APC 6 Circuit 120Vac Smart-Home Transfer Switch

FEATURES

6-circuit auto load-shed home transfer switch
(mount next to your main electrical panel)

120Vac, 30Amp watertight house inlet kit

30A/120Vac UL 1008 listed transfer switch
(conforms to NEC 702.11(B))

Auto load-shedding is fully programmable
(each circuit can be individually controlled)

Programmable for UPS backup
(battery back up critical loads)

20"H x 16"W x 4"D

Pre-wired for easy electrician
installation - all extra parts included to
keep install costs down!

BENEFITS

You don't have to head to the basement in the dark - the transfer switch automatically powers your selected circuits after your generator starts!

You don't have to be home - a neighbor or family member can simply plug it in and turn it on with no home entry needed.

More loads from a single 120Vac generator with automatic load shedding! Just program each load for max acceptable off time and minimum acceptable on time and it will turn off loads to make room for larger loads like intermittent microwave use and fan or pump motors starting.

UPS Backup - Just plug in a battery based UPS into the front UPS inlet and select which circuits you want powered while you plug in your generator.

A FEW OF OUR MANY ACCESSORIES

L5-30 to 3 outputs

12' gas extension hose

Parallel cables

6' SS braided gas extension hose

Water resistant cover

N-G Bonding plug

ACME to POL
