PROPANE Kit for **HONDA** EU2200i By Genconnex®

Designed specifically by
Genconnex® for the Honda
EU2200i

Got Propane? No more gasoline!

Propane lasts forever & run days not hours!

Keep it Simple

- ✓ Heat
- ✓ Sump pump
- ✓ Fridge & Freezer
- ✓ Microwave
- ✓ Hall lights
- ✓ TV & Internet
- ✓ RV Power

Problem Solved.

Propane kit for your Honda EU2200i Inverter Generator. Kit includes choice of hose such as a 6' propane regulator & hose for connecting to a standard 20-60lb BBQ tank. Other hoses are available. See website for details!

Everything fits safely inside!

Power for days not hours!

No drilling or cutting - 100% reversible
(propane tank and generator not included)

Minimum single 20lbs propane tank for operation at >25deg F. Tank size must be increased for lower operating temperatures at continuous max loads. Approximate 20hrs run time for typical home load in ECO mode on single 20lb tank.

Parallel cables

6' SS braided gas extension hose

Honda cover

N-G bonding plug

ACME to POL

EVERYTHING FITS SAFELY INSIDE!

We engineer our gas systems pre-set for optimum operation with everything safely shock mounted inside. Ice, snow and dirt can shut external drilled-on kits down while we keep running.

What sets us apart? All Genconnex[®] products are made exclusively with custom stainless steel and aluminum structural components, use all stainless steel locking fasteners for vibration resistance, and all gas line components are brass to resist corrosion and fatigue (as seen often with plastic fittings). No cutting or drilling required. This kit is EPA certified for installation and use in the Honda EU2000i generator in all 50 States.

OPTIONAL 20A-120V Genconnex[®] Automatic Transfer Switch Kit

AUTOMATIC Transfer switch

FEATURES

- 120Vac, 20Amp Watertight Inlet kit** (Hubbell Shipboard series L5-20)
- 20A Transfer Switch (UL 1008 Listed)** (conforms to NEC 702.11(B))
- Eaton 125A Sub-Panel (UL Listed)** (w/ 2-20A and 6-15A breakers)
- 20A Load Selector Switch (UL Listed)** (4 Critical & 4 Comfort Selector Switch)
- Electrician Installer kit included**
- 24"H x 12"W x 6"D**

BENEFITS

- You Just plug in and turn on the generator** - the transfer switch automatically changes to power your selected circuits!
- You don't have to be home** - a neighbor or family member can simply plug it in and turn it on with no home entry needed!
- Double the load from a single 120Vac generator with SwitchSelect™** to power up to 4 Critical loads like heat and fridge, or switch to up to 4 Comfort loads to cook meals and watch TV!
- Just turn it off when you're done** - the transfer switch automatically changes back to home power!

Pre-wired for easy electrician installation - all extra parts included to keep install costs down! (you supply wire from outdoor plug to panel, and 30Amp circuit breaker for your particular main panel - everything else included)
