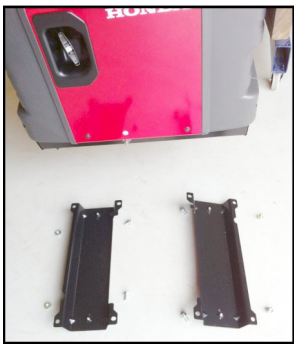
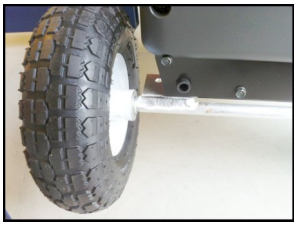
# GenConneX™ Honda EU3000is All-Terrain Wheel Kit Installation Instructions



**Step 1:** Support unit on wooden blocks then remove both bottom rails with 12mm socket.

**CAUTION: UNIT IS HEAVY AND CAN CAUSE INJURY OR DAMAGE IF NOT PROPERLY SUPPORTED**

**Step 2:** Attach axles on both ends using bolts and nuts from bottom rails (note tabs on axle protrude out to keep wheel from touching generator case).



**Step 3:** Slide on wheels with with protruding hub of each wheel facing toward unit (so wheels don't rub against generator).

**Step 4:** Install cap nut on each axle end by tapping in place with 3/4" socket and small hammer. Check each tire for proper inflation pressure (20-30 PSI Max).
