

# GenConneX™ Tech Note

## GenConneX Bi-Fuel EU3000is Orifice Change

This tech note provides instruction on how to change the fuel orifice on the GenConneX™ Bi-Fuel Modified Honda EU3000is

**Tools needed:** *small flat blade screw driver*  
*3/16" hex head Allen head wrench*

**Est. time for install:** *5 min.*

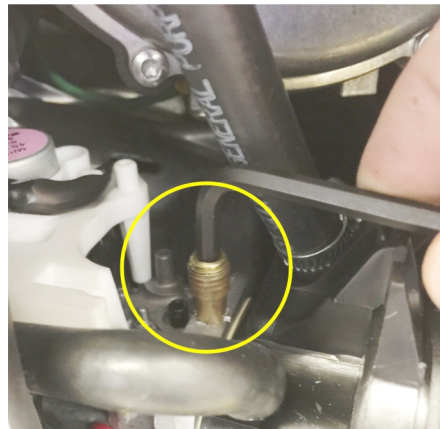

**Step 1:** Open side door to gain access .

**Step 2:** Locate black fuel supply hose and loosen clamp near carburetor (Pic 1)

**Step 3:** Pull off black fuel supply hose and remove allen head set screw orifice from brass injector tube end (Pic 2). Save this orifice to switch back at later time.

**Pic 1**

**Pic 2**

**Step 4:** Re-attach hose and tighten hose clamp.
